

Quiz

1. Create a new project.
2. Download the files from 'Lab0Quiz' folder on Moodle and place them in your project.

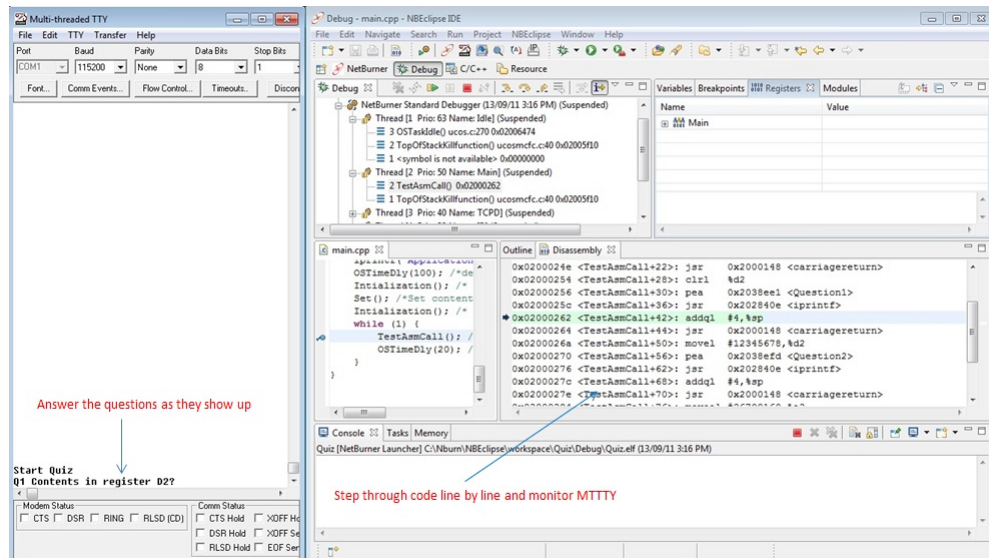

3. Create a Debugger session and place a breakpoint at the line 'TestAsmCall' in the Main.cpp file.

4. Start the 'MTTTY' program and connect to board

- Run the Debugger session until the program halts at the line 'TestAsmCall'
- Step into the Assembly Code
- Step through the assembly code line by line. Monitor the screen in 'MTTTY' for when it prompts you to answer the question.

- To submit your answers, start the Lab0 Quiz in Moodle. The quiz is multiple choice questions and only one attempt will be given. I strongly recommend that you record the answers on paper and review them before submitting the quiz.
