Quiz

- 1. Creat a new project.
- 2. Download the files from 'Lab0Quiz' folder on Moodle and place them in your project.

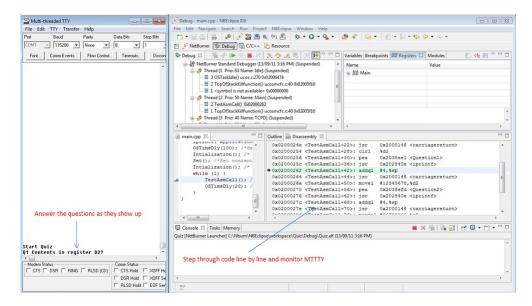

3. Create a Debugger session and place a breakpoint at the line 'TestAsmCall' in the Main.cpp file.

4. Start the 'MTTTY' program and connect to board

- 5. Run the Debugger session until the program halts at the line 'TestAsmCall'
- 6. Step into the Assembly Code
- 7. Step through the assembly code line by line. Monitor the screen in 'MTTTY' for when it prompts you to answer the question.

8. To submit your answers, start the Lab0 Quiz in Moodle. The quiz is multiple choice questions and only one attempt will be given. I strongly recommend that you record the answers on paper and review them before submitting the quiz.
